- ✓ AFFORDABLE
- ✓ FIXED MONTHLY FEE

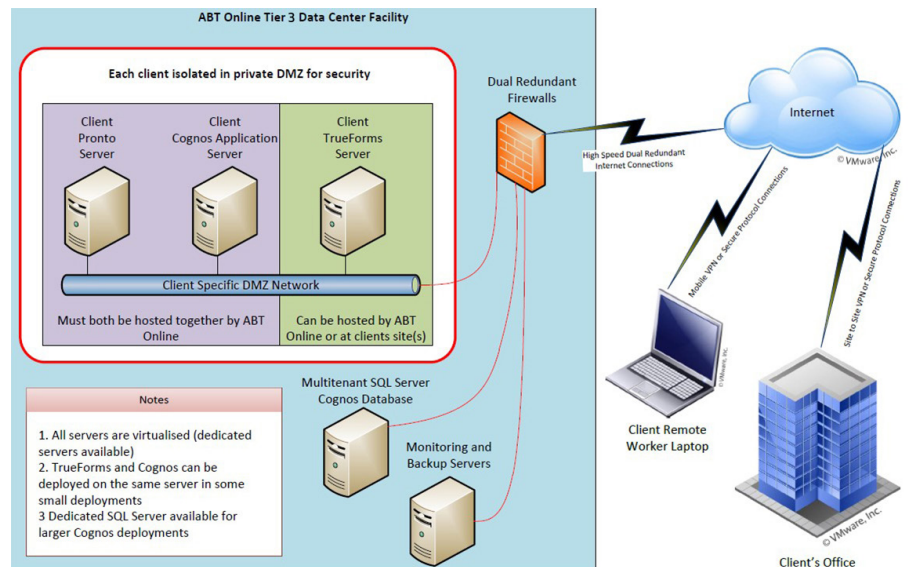

Why ABT Online SaaS Solution?

In tune with global trends that are witnessing a major move by enterprises to the cloud, ABT Online has launched Cloud SaaS Solution that is founded on the world's best-practice Pronto-Xi Enterprise Management System which we have represented and enhanced for almost 30 years.

This solution cut your costs greatly on information technology (IT) and skilled resources by making Pronto-Xi available "through the Cloud" on a Fully Managed Services basis at a fraction of the capital cost to purchase and operate it.

It enables you to access applications and Pronto sophisticated management system on a 'need to', 'pay as you go basis', without making huge investments in IT infrastructure. With the exception of initial training & implementation costs, which will vary dependent upon your requirements, there are no extra costs, and no hidden charges.

ABT Cloud-based Software-as-a-Service (SaaS) solution is a fully managed IT system that has been developed for companies who require a sophisticated Business Management solution, but do not want to pay for it and own it. With the exception of initial training & implementation costs, which will vary dependent upon your requirements, there are **no extra costs, and no hidden charges.**

● Functionality

A complete business solution for any enterprise! Modules available cover industry segments and link users with sophisticated applications to maintain operational control of any organisation;

● Usability

Fully web-enabled for common internet browsers access, or access via the rich-client Secure ProClient access portal. The system is familiar, menu driven, has full on-line help and easy to use with consistent screens;

● Security

Pronto-Xi access is determined by world-class, sophisticated user security at the central Host level and also includes a defence-department standard 128-bit encryption Secure Socket Layer (SSL) client access;

● Rapid-deployment

Using ABT Rapid Deployment Implementation Methodology (ARDIM), we have extensive experience in management, implementation, training and on-going facilities management for Small-medium enterprise organisations;

● Reportability

Pronto-Xi includes IBM Cognos10, an "Analytic" Business Intelligence (BI) system to provide flexible methods of extracting information, for any reporting or enquiry purpose;

● Scalability

Easy migration to larger database environments and file storage systems as your needs expand;

● Integrity

Pronto-Xi has a commitment to technology driven R&D, ensuring that the product is maintained to a world class standard.

● High Availability

24/7 access to the system is available and you can reach us for application software support during normal business hours. We can also customise extended support hours to meet your individual needs for specific projects and tasks.

Infrastructure Peace-of-mind with Your Software-as-a-Service Solution

- **Regular maintenance and backups**

No more worries about the backups and servers! ABT Online will run daily backups that are stored on multiple layers off-site for you and perform regular preventive maintenance on the servers to keep their optimal health. All servers are fully managed by ABT Online and located in Sydney based Tier 1 data centre.

- **Lower investment and running costs**

No investment in hardware or labour to manage your IT infrastructure and no increased power bills for underutilised servers! As a subscription-based service, you only pay for what you need and use.

- **Enhanced performance, reliability and scalability**

ABT Online have the skills, experience and flexibility to quickly increase disk, processing, and most resource capacity requirements when needed.

- **Secure internet connection**

ABT Online uses multiple, redundant internet links which, in the event of one ISP experiencing an issue, is automatically re-routed. Additionally, we can provide clients with a direct link that doesn't traverse the internet, or with a VPN from ABT Online to the client's office to encrypt all data.

- **Greater Security**

The highest level of security for your data with the servers being monitored 24 hours a day 7 days a week! Located in Sydney, our data centre is unlikely to experience geographical outage and is secured by guards 24x7x365.

It is built above sea level with no basements and has several flood control systems including moisture detention sensors and drainage/evacuation systems. It has a VES-DA fire detection and suppression to detect fire as early as possible and extinguish. All doors, including cages are secured with biometric hand geometry readers.

The whole data centre is covered by CCTV digital camera and has a bullet resistant protection. Structural systems at our Data centre meet or exceed local building codes for lateral seismic design forces. Equipment and non-structural components are anchored and braced.

As part of your ABT Online SaaS solution, we have partnered with a globally renowned, locally managed, data centre organisation to protect and connect your most critical business information. Key to your peace of mind is the delivery of our service with all the attributes of a large corporate installation, without the capital cost. Our world's-best-practice co-location centre in Sydney enables us to safeguard your mission-critical data with the highest levels of security and operational reliability.

- **Hardware Reliability- always available power**

Our data centre is designed with power systems that have built-in redundancy, full Uninterruptible Power Supply systems with N+1 levels or greater to prevent power spikes, surges and redundant backup diesel generator systems in the event of local utility failure to maximize uptime availability. Our data centre also has a robust HVAC system to provide stable airflow, temperature and humidity with minimum N+1 redundancy.

- **Single point of contact - ABT Online Help Desk**

A single point of contact is provided with after-hours support also available. Our Response Centre is manned by a full-time service coordinator and both software application specialists and infrastructure engineers for all of your system questions and on-going or arising issues.

- **Accreditations**

ABT Online is committed to operating facilities that meet the rigorous standards and compliance needs of global businesses. Our data centre works with several regulatory and standard organisations to ensure compliance - from operation of the data centre to sustainability and environmental regulations including SSAE16 Compliance, ISO 27001 and 9001 Certifications as well as LEED certification. LEED provides building owners and operators with framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.
